DUBAI HILLS CORRIDOR, DUBAI

Sereno Gardens

Family townhouses on the Dubai Hills corridor

STARTING FROM

AED 3,400,000

approx. USD 926,000 / EUR 855,000

The address families move to and then stay in.

A gated townhouse community built around a central park, inside the school catchment that drives most family relocation in Dubai. Homes run over two floors with a private rear garden, a covered terrace and a maid's room taken off the utility corridor rather than carved out of a bedroom.

This is the part of the market that behaves least like a speculative asset and most like a home. Occupancy stays high, tenants renew rather than rotate, and resale is driven by families rather than by investors reading the same yield table.

RESIDENCE FEATURES

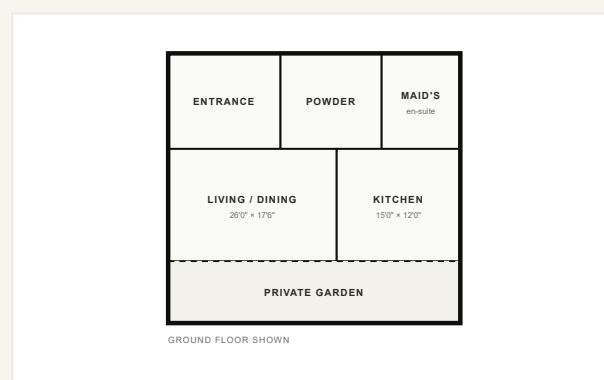

- Private landscaped rear garden
- Two covered parking bays
- Maid's room with en-suite
- Community park and residents' pool
- Nursery and schools inside the master plan
- Cycle route to Dubai Hills Mall

INDICATIVE FLOOR PLAN

LOCATION

THE INVESTMENT CASE

A lower headline yield than the apartments, and materially lower churn to go with it. The family segment renews instead of rotating, which is what protects net income across a long hold.

HOW THIS PREVIEW WAS BUILT

Your budget, not a mailing list

The range you tapped decides what appears here, and every residence was checked against it before it reached this page.

Budget as a range, not a ceiling

One option usually sits above where you said, on purpose. It is worth seeing what the next tier buys before you rule it out.

Illustrative, and clearly so

These are composite examples of what is available at each level, not live units. Nothing here is a listing you can reserve today.
